

“Hanover adds critical manpower to Blue Diamond’s product marketing efforts. Our team has limited time, and therefore uses Hanover to devote a level of attention to specific categories of interest that we cannot dedicate ourselves. Through the partnership, Hanover conducts the deep-dive category assessments we need, allowing our team to focus on addressing the high-value business questions that arise from the research.”

- Al Greenlee, Director of Marketing

THE CLIENT

Blue Diamond® Growers (Blue Diamond) is the world’s largest almond processing and marketing company. It has achieved such growth by expanding into new markets and finding new uses in existing ones – efforts validated by a 10 percent annual increase in the global demand for almond goods.

THE PARTNERSHIP

Hanover Research expedites Blue Diamond’s assessment of potential expansion targets to fuel business growth. Initially engaged with Hanover to conduct category reviews when evaluating growth opportunities within the Almond Breeze product line, Blue Diamond has since expanded its partnership with Hanover to conduct additional research related to new business development.

THE RESEARCH PROCESS
