

CHALLENGE

Aultman College of Nursing and Health Sciences (Aultman College) sought accreditation for its newly created 4-year health sciences degree program, required by the Higher Learning Commission (HLC). However, Aultman College needed assistance in completing a community readiness assessment for the program.

SOLUTION

Aultman College partnered with Hanover Research to produce an in-depth **Program Demand** assessment of the market for a Bachelor's degree in Health Sciences, considering **potential student** and **labor market demand** across a variety of specialization areas.

IMPACT

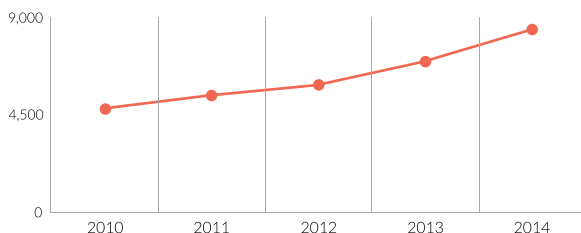

Hanover's analysis revealed that both labor market demand as gauged by employment projections for graduates of four-year health sciences programs and student demand as gauged by degree conferrals were both trending favorably.

TO DETERMINE PROGRAM DEMAND, LOOK FOR RISING STUDENT AND LABOR MARKET DEMAND

Hanover was integral in preparing our case with the HLC. Through Hanover's research, Aultman College had a foundation that led to HLC approval with no monitoring required. We are thrilled to be able to offer this high-demand program to students.

— Amanda L. Espenschied-Reilly, Ph.D., Dean of General Education & Online Learning

Using Hanover's analysis, Aultman College:

- ✓ Successfully received accreditation from the HLC for its four-year health sciences program.
- ✓ Will launch the college's first four-year health sciences degree program in Fall 2017.
